A laboratory setting with various glassware and glowing light bulbs. In the background, several test tubes are visible, some containing liquids and others with bubbles. In the foreground, two large, glowing light bulbs are prominent: one is a cool white/blue color, and the other is a warm yellow/orange color. To the left, a beaker contains a red liquid. To the right, a beaker contains a yellow liquid. Wires are visible on the right side, suggesting an electrical setup. The overall lighting is dim, with the primary light sources being the glowing bulbs and the contents of the glassware.
